

SafetyChoice® PERS with Caregiver Connect Features

- Compatible with standard tone landline and most VoIP
- 24-hour emergency battery back-up, should a power outage occur
- EMERGENCY button on the base and/or pendant alerts the central monitoring station for help
- CARETAKER button keeps you connected when it is not an emergency
- Optional HELP speaker button
- Multiple waterproof pendant options, including an optional two-way voice pendant and range options for up to 1,000 feet
- Friendly, professional representatives are on duty at the central monitoring station around the clock, and will stay on the line until help arrives

PERS WITH CAREGIVER CONNECT

Keeping Seniors Safe with a Direct Connection 24/7

Comfort Keepers® SafetyChoice® Personal Emergency Response System (PERS) helps loved ones live safely and independently at home with the added benefit of a direct connection to a personal or family caregiver or, in some instances, a Comfort Keepers® office. You get dependable 24/7 centralized monitoring to ensure that help is always available.

In addition to the basic waterproof button, the SafetyChoice PERS allows the choice of adding a waterproof two-way voice pendant for extended voice connectivity that spans up to approximately three acres from the base unit.

The unit also features the ability to add a stationary HELP speaker button, while the CARETAKER button on the base unit keeps you connected at times when emergency help is not needed.

SafetyChoice offers a wide range of PERS products with a variety of ranges and features. Contact your Comfort Keepers office for more information.

We offer a variety of PERS types to fit your lifestyle:

<p>Personal Emergency Response System G2000</p> 	<p>Cellular PERS</p> 	<p>Fall Sensor</p>
